LAWYERS’ ROLE

A Lawyer is an "officer of the court". This means that, though the lawyer is supposed to represent the client, an underlying Duty binds the Lawyer to the legal system itself. This duty includes rules of court etiquette and deference to Judges. It also includes allegiance to conventional Jurisprudence. In short, Lawyer tend to become more attached to other Lawyers and to the “NORMAL” way of doing law than to their client.

In case where a lawyer represents oppressed or marginalised people, the Lawyer all too easily takes control, determining not only which legal tactics and strategy will be employed, but also the overall goal of the case. When the lawyer has little or no real understanding of the client World-view, as often occurs in Indian cases, the entire purpose of the case can be completely transformed bringing about results that may be antithetical to those intended by the clients. But the Lawyer will typically say that this is the way it has to be done.
