### Abstract

Drug addiction and alcoholism has become the foremost social issues since 1980s that has to be self-addressed together by each government agencies and NGOs. The govt. and NGOs have their several agencies and have contributed their vital role in combat against the dual social evils of drug dependence and alcoholism. The govt. agencies in fight against the drug and alcohol dependence are Excise, Police departments, Prisons and hospitals for treatment centers. Whereas the NGOs and civil bodies like Mothers' associations, Students Body (Union), Rehabilitation and Drop-In-Centers (DICs) and religious institution represent of NGOs within the battle against the drug and drug abuse in Government. This paper makes an attempt to elaborate the role of the authorities and NGOs in addressing the dual social issues of drug and alcohol abuse in the India.

### Keywords

Drug Addiction, Government, NGOs, varied Agencies, Preventions.

(1) Introduction

Dependency could be an advanced illness. It has characterised by intense and, at times, uncontrollable drug craving, in conjunction with compulsive drug seeking and use that persist even in the face of devastating consequences. Many folks do not notice that addiction is a brain disease. Whereas the path to dependency begins with the act of taking drugs, over time, a person's ability to decide on to not do therefore becomes compromised, and seeking and intense the drug becomes compulsive. This behavior results for the most part from the results of prolonged drug exposure on brain functioning. Addiction affects multiple brain circuits, as well as those concerned in reward and motivation, learning and memory, and repressing management over Behaviour.

(2) Role of state Agencies

The govt. has a watchdog and regulatory role to play in curb drug and alcohol drawback in Government. The excise, prison, police departments, and hospitals for treatment centers are the Governmental agencies in curb the drug and alcohol drawback within the Naga society. Excise and police departments are the law imposing government agencies that work for public welfare. The subsequent are the varied roles and contributions created by the govt. agencies in safeguarding the lives from the evil forces of drug and drug abuse in Government.

(3) Role of NGO's

The most thrust of those programmes is to strengthen the ties of addicts to their family and community and acquire the community to work in the rehabilitation process. As we have got seen on top of the various technique of Effective treatment. These treatments needs the support of Family, Doctors, Friends, and Relatives and in particular, once these cannot offer time to us we would like the organization operating during this field for Drug dependence persons. The de-addiction centers surpass Nongovernmental organizations use varied systems of medication akin to allopathy, Homeopathy, ayurveda, treatment and yoga including a spread of psychotherapies to cure addicts. The substance abuse data Rehabilitation and analysis Centre (DAIRRC) could be a registered public trust that's concerned in rehabilitation of addicts. it absolutely was supported in 1982 within the town of Mumbai. This centre provides a large range of rehabilitation services such as Heroin addiction treatment, drug addiction treatment, Solvent Abuse Treatment, Treatment for addiction to Prescribed Medication, dolophine hydrochloride addiction treatment and Treatment for addiction to all or any different medicine of Abuse. If drug addicts are to be fully rehabilitated, it's necessary for the area people to be concerned within the treatment and social integration of addicts. to market such an initiative variety of are being frequently organized at the community level through voluntary organizations. These camps offer counselling, treatment and rehabilitation facilities to drug addicts in the localities they live

in. Building awareness and making therapeutic communities are other ideas that help within the rehabilitation of addicts help techniques have tried to be quite helpful in the treatment of various sorts of addictions a preferred cluster that gives such techniques is Narcotics Anonymous. This group conducts non-public conferences wherever addicts learn from different addicts a way to stay drug free and endure addiction.

(4) Guidance and Awareness Centers

These meetings are conducted frequently in cities akin to Bangalore, Mumbai, and New Delhi and Chennai. Currently, the ministry supports 361 voluntary organisations that maintain 376 De-addiction-cum-Rehabilitation Centers and sixty-eight counselling and Awareness Centers in numerous regions of the country. The govt. conjointly runs 100 Deaddiction Centres at its hospitals and Primary Health Centers for those who need long-term rehabilitation. The National Centre of Drug Abuse Prevention has identified 8 NGOs with strong technical capabilities to provide training and information at regional levels, monitor programmes and implement the Drug Abuse Monitoring System. These NGO's are The Calcutta Samaritans, Mizoram Social Defense and Rehabilitation Board, Mukhtangan Mitra, Society for Promotion of Youth and Masses, TT Ranganathan Clinical Research Foundation and Vivekananda Education Society.

(5) Role of NIDA's Special Initiatives for Students, Teachers, and Parents

1) Heads Up: Real News about Drugs and Your Body – A drug education series created by NIDA and SCHOLASTIC INC. for college kids in grades half dozen to 12.

2) NIDA for Teens – an internet site for teens (with resources for educators and parents) that has age-appropriate facts on medicine.

3) National Drug and Alcohol Facts Week– A week-long observance that encourages Community-based events and dialogue between teens and scientists concerning drugs and alcohol.

4) Drug and Alcohol Facts Chat Day – an online chat between NIDA scientists and teens, command through college pc labs once a year throughout National Drug and Alcohol Facts Week

(6) Role of Society in Medicine Addiction

To investigate the topic totally some problems could also be mentioned initial keeping in sight the link between the society and drug abusers. Within the over-all view of the society, medicine abusers are its aberrant members who do not follow its rules and norms. Here, it should be mentioned that drug abusers are merchandise of the society. Below what social

conditions do they emerge as products of the society? It's the question that is asked naturally. An intensive discussion of this question can shed light on the premise on which the society will take up measures to stop drug abuse. The aberrant members of a society are not born thus. They acquire this aberrant attribute whereas growing up within the society. New Directions for Society's Role in Reducing Addiction: If up to now neither legislation nor naturally developed self-control has been effective in serving to USA together accomplish the extent of self-control we would like to avoid addictive behavior in the up to date world, it might be seem to be time for locating new directions. One promising direction is that the development of community structure and support at the points, particularly throughout development, that addictive behavior might otherwise arise. One obvious place to start considering a way to develop such community structure and support is that the study of individual behavior.
