ABSTRACT: -

In the history of the world, globally struggling for survival of life in the human being due to the COVID-19, viral diseases. It is the disease caused by a new corona virus called SARS-CoV-2. WHO first learned of this new virus on 31 December 2019, following a report of a cluster of cases of 'viral pneumonia' in Wuhan, People's Republic of China. The pandemic COVID-19 arrested the entire human activities around world. Especially decline of economic (Bachman D. 2020) development, depletion of employment, loss of educational development and resistance of people enjoyment and big loss human being death from young child to adult all over the country. Here I analyzed COVID-19 how make the undesirable and desirable behavior of the peoples day to life in the world. Whereas here I enlighten to negative and positive impact of Economic development, Employment opportunity, Educational development, Enjoyment and life style peoples.

KEY WORDS:-

COVID-19, Economics, Employments, Educational Technology, Enjoyment and life style..

INTRODUCTION:-

Today every country entered to find out the medicine for covid-19 virus disease. Corona viruses are **zoonotic**, meaning they are *transmitted between animals and people*. Several known coronaviruses are circulating in animals that have not yet infected humans. This new strain of coronavirus has been officially referred to as the **novel corona virus** (2019-nCoV). We have to analyze how and where the tedious virus originated. Why this virus spread over the air and it follows only human being. This virus not affects animals but mostly affected peoples in all ages. What is the reason only affect the human being? So I think some relationships are there in the human being. We are noticed this virus origin from animals so this virus have animals genetic characters, that is why it not affect the animals. For that I concluded the covid-19 virus body contains a peculiar genetic substance which spread over the air only in the human being. Here I presented the impact covid-19 virus economic, employment, education, enjoyment and life style,

OBJECTIVES OF THE STUDY:-

The present research study focused on the following objectives.

1. To enlighten negative and positive impacts of covid-19 in the economic.
2. To explore negative and positive of impacts covid-19 in the employment
3. To analyze negative and positive impacts of covid-19 in the education
4. To highlight negative and positive impacts of covid-19 in the enjoyment.
5. To evaluate negative and positive impacts of covid-19 in the life styles.

METHODOLOGY:-

Data and information presented for this study, researcher prepared own questionnaire and data are collected based on the economic, employment, education, enjoyment and life style during covid-19 pandemic worldwide. I have interacted and gathered information through electronic media, webinar and conference on economic experts, companies, industries, employees, schools, colleges, universities and worldwide peoples of rural and urban areas. Data also collected from international journals, educational research organization worldwide. Further the data also collected from daily covid-19 status news report world over media. The data analyzed and interpreted statistical content validity relating to impact of covid-19 on economics, employment, education, enjoyment and life style are referred.

CONTROL MEASURE OF THE COUNTRIES:-

When the covid-19 start to spread over the air all of the countries amended the lockdown due to stopped and closed all the transport such as airport, ships and buses etc. The world health organization (WHO may, 20.2020) enforced the following preventive measure every day stage by stage. The WHO ensures following prevention activities: - social distancing, wearing face mask and washing hand with soap or sanitizer. Further WHO also instructed to avoiding of travel, gathering groups and conference like many restriction every day all over the world. The media also every day telecasting covid-19 virus (Horowitz, J.2020) defect of the peoples age wise and sex wise in every countries the major head news. Whereas here I observed and studied how covid-19 virus changed the peoples life in that critical periods.

1. NEGATIVE IMPACT ON ECONOMIC SECTOR:-

The economic impact of pandemic covid-19 virus is very disturbing. Economies of about hundreds of countries have been destroyed out of which some of them have asked for monetary help from IMF. Businesses across the world namely hospitality, entertainment, aviation etc have seen a major negative impact. Various sports events such as Indian Premier League (IPL) and Olympics have been postponed. Schools and colleges have been closed. The virus has also disrupted the functioning of various online giants such as Amazon. Countries such as USA, Italy and Spain are suffering the most since their death toll is very high. There is a big shift in the world economic market and the share market has witnessed crashes day by day. Factories, Restaurants, Pubs, Markets, Flights, Super Markets, Malls, Universities and Colleges etc. were shut down. Fear of corona virus has limited the movement of the individuals. People were not even going to buy the daily essentials and these all were somewhere impacting the economy of the world as a whole. The Organization for Economic Co-operation and Development (OECD) reveals that they have cut their expectation for global growth to 2.4% from 2.9%, and warns that it could fall also was 1.5%.

On 30 January 2020, the Director-general of the World Health Organization (WHO) declared the outbreak of covid-19 to be a Public Health Emergency of international concern and issued a set of Temporary Recommendation so for all countries announced lockdown but it may continue till discover of the medicine. At the same time all industries also got lockdown. So the production was stopped but need increased. Mainly the daily labor suffered for food it lead to like no work no pay, in this time government, non-government organization and some political parties provided food substance and other basic needs. In this critical situation the world economic got decline.

2. POSITIVE IMPACT ON ECONOMIC SECTOR: -

During the lockdown periods peoples spend much of time in their home. Due to restricted lockdown periods the peoples used less expense for foods and basic needs. So wastages are much reduced. All goods are come in to their home it leads to saving attitude of the

peoples mind. The peoples spend only for the food items so that is the reason falling economic compensated. While the lockdown of the industries pollution mostly reduced and the food crops production was increased. The covid-19 pandemic virus was affected only the human being and not affect nature including flora and fauna. These times the family members spend much of time in their home it leads to family honor and understanding of each others.

3. NEGATIVE IMPACT OF EMPLOYMENT:-

Due to covid-19 pandemic lockdown periods all the industries and companies were closed so unemployment increased worldwide for that peoples return to their hometown. When the people to their hometown they suffered lot because without money, food and transports. Many of the peoples started return hometown by thousands kilometer by walk in this times many people's also died due to without food and unsupported their body conditions. Over 4 Million Young Indians Have Lost Jobs Due To Covid-19 Impact, Says ILO-ADB Report PTI @PTI_News Bookmark August 18 2020, 6:21 PM August 18 2020, 8:08 PM As many as 41 lakh youth in India lost jobs due to the Covid-19 pandemic with most job losses in the construction and farm sector, according to a joint report by the International Labour Organization and the Asian Development Bank.

4. POSITIVE IMPACT OF EMPLOYMENT:-

During the covid-19 pandemic lockdown periods only closed industries and companies but the agriculture industries not closed. So the peoples returned to agriculture filed that is why during the lockdown periods foods and vegetables supplied from agriculture fields. Most of the peoples return to self employed through agriculture. In the critical periods peoples thinking involved how to protect against from covi-19 pandemic in the result of strengthening the immune system against covid-19 through agricultural innovations. The WHO also instructed the people could take healthy food in the quarantine periods which is protect from covid-19 virus. The pandemic virus expressed all over the world importance of the agriculture.

5. NEGATIVE IMPACT OF EDUCATION:-

The formal educational system totally affected due to covid-19 pandemic lack down worldwide. Schools, colleges, universities and other research institutions were closed in this terrific period. In this time private schools, colleges and universities entered in to conducting online classes and collected fees. Many of the private schools started online from primary classes onwards. Wealthy students learning continuously eight hours sitting in the same place it leads to mentally and physically affected in their . Whereas most of the government schools students' coming from very poor family, they do not have such specialties in their home. So they even could not able to listen television lesson which is conducted by government. During the post covid-19 most of the government schools students entered into private industries it was leaded the child labor.

6. POSITIVE IMPACT OF EDUCATION:-

The students learned much of technology utilization during the covid-19 pandemic lockdown periods. At the same time own thinking power well developed. The ability of finding solutions for the problems and with subjects oriented. Students can taken the own time for study the subject books. There is no compulsion, no time schedule no time periods for their study. There is no exam and no result and promoted next classes so the students enjoyed in this lockdown periods. While the students were escaped from carrying book bags. Most of the students developed general knowledge from listening daily news and reading newspapers. The students' health is well improved due to without packed food. Most of the schools, colleges and universities started online teaching this was proved the Ivan Illich' deschooling society (Gintis, H. 1972) Our world dramatically changed in 2020, highlighting the growing need to incorporate social and emotional

learning(SEL) in school. The Covid-19 pandemic has changed not only how people spend time, but with whom they spend it. Partnered people may be spending more time with a spouse or cohabiter while singles spend more time alone. This column investigates how these changes in time allocation might affect individual feelings of wellbeing. During covid-19 lockdown periods peoples were improved their knowledge through reading various books.

7. NEGATIVE IMPACT OF ENJOYMENT:-

When the lockdown periods all the entertainment places were closed, such as parks, cinema theatres, and tourist places, shopping mall, daily markets and also restricted public places. Gym and other physical training centre were closed and also banned walking on the public places. So for the peoples mentally and physically suffered. When they go out should use mask, social distance and every now and then hand wash with sanitizer for this situation firstly not like to adopt. Local temples, shops were closed. Everywhere warning board and police protection and announced against the covid-19 virus disease. every where all over the all countries. Public meeting, group meeting, temple prayer, religious meeting, festival a celebrations, wedding, birthday and also funeral That the critical time some peoples not allowed burial ground to covid-19 affected dead body. Thousands of dead bodies buried at same burial ground some countries on the world and while the crisis could take an emotional toll on unmarried individuals forced to spend more time alone.

8. POSITIVE IMPACT OF ENJOYMENT:-

9. NEGATIVE IMPACT OF LIFE STYLE OF THE PEOPLES:-

During the pandemic covid-19, virus changed overall human life styles. The peoples not allowed to outside of their home and public places it leads to physical mental stress and strain. The family problems raised within husband and wife and with children's due to various complicity. Sexual abuse occurred. Various countries and drug abuse raised among youngsters. When the pandemic periods food systems mostly changed it leads body illness. Most of the peoples continuously watched television serial, android cell phones it all are leads to physical defect. That is physical and mental tension increased.

10. POSITIVE IMPACT OF LIFE STYLE OF THE PEOPLES:-

When the world wide pandemic lockdown peoples mostly enjoyed with their family members, husbands and wife shared with their household works. Everyone tried to learn something new over the online. Many people conducted web conferences and many of the peoples attended online seminars, webinar as per their level. Some of the person tried to find medicine for covid-19. During these periods peoples came back to natural food, ancient life styles. They also used to traditional games and they spend much time in their family. The educated peoples involved wringing article, stories, finding answer for puzzles and also increased reading skills are increased. They also avoid grand celebrations of the festival and any other functions so they were saved their money, family and relatives due to pandemic lockdown. There is not a single student in this country that is to blame for COVID-19, [yet] we know the impact is harming students in disproportionate ways.”

Error! No text of specified style in document.FIG-1 THE INTER RELATIONSHIP BETWEEN ECNOMIC, EMPLOYMENT, EDUCATION, ENJOYTMENT AND LIFE STYLE DUE TO NEAGATIVE AND POSITIVE IMPACT OF COVID-19 PANDEMIC VIRUS

Above figure showing the negative and positive impact of covid-19 pandemic virus among economy, employment, education, enjoyment and life style.

SUGGESTION:

1. We have to develop peoples' resistance power against the covid-19 pandemic virus worldwide for the we have to produce agricultural products and medicines against the covid-19 pandemic.
2. WHO should collect the data about health and environment sanitation all the countries and It should be displayed for all in the public.
World countries should be analyzing their economic status and assured to every man live.
3. The employment opportunity everyone for their minimum needs.
4. The countries should be ensure the alternative education system and it maintain reached all the peoples during the covid-19 pandemic lockdown periods.
5. The countries should assess the peoples enjoyment and their life style because indicate leads to Good health and in their healthy nation.

CONCLUSION:-

The covid-19 pandemic virus has much affected the human being. The economic sector, employment sector, Education sector, people's enjoyment and life style also much affected. However up to December 2020-12-20 the human death is crossed one crore. Though it has created many Challenges, Various opportunities are also evolved globe. Here I analysed and presented the negative impact covid-19 on decline of economy, employment, education, enjoyment and life style. At the same

time positive impact of covid-19 on the development technology in the education sector around the

World. The COVID-19 pandemic has had a profound effect on this fall and winter, and it's made one

thing clear: Students need teachers, not computers, to assess their early reading skills. protected the nature during the pandemic lockdown, while Peoples should Follow the WHO recommendations and practice live with nature.
